Wolfeboro Eye Associates Optomap

The Optomap Retinal Exam:

-Is fast, easy, and comfortable; may alleviate the need for dilation; provides a permanent record for annual review

An optomap Exam gives us a panoramic image of the surface of your retina.

These images help the doctor assess the health of your eyes and check for

conditions including macular degeneration, glaucoma, and retinal detachments.

These problems can threaten vision without warning or symptoms. Early detection could help save your vision or your life.

The cost of the optomap Exam is $39 without a supporting billable retina related diagnosis (floaters, diabetes, etc)

The cost of the optomap is INCLUDED in the cost of a SELF PAY comprehensive eye exam.
